The Connecticut Democrats for the want of something else to say felt obliged to adopt the regulation Democratic plat form hence we find a plank condemning the extravagance of the last Republican Congress This performance leads the New York Morning Ale river to remark 'At this time when the whole country is hot with indignation over the thieving propensities of the Democratic majority in the House it would have been more decent for a Democratic convention to havef remained silent on the subject

Congressman Reed who has been muck ing life a burden to Mr. Helman for the past le v days has a new defluttion for Democratic economy. It is opposition. to everything you do not want yourself This seems to fit the situation in the House exactly The River and Harbor till the major perturn of which is for im provements in the South shipped through the House as though it were greased but when the item making an appropriation for the Philadelph a mint was reached these Southern conomists voted to of

The Boston H = II is satisfied that the $\frac{186}{12}$ only salvation for the Democratic party is tariff reform and Cleveland although it. lanew willing to admit the even then it may be an uphill fight. The perform ance of the big Democratic majority in the House has made our Mugwamp contemporary very apprehensive of the result of this fall. The tariff cannot be made too proif nent in the campa gn to suit the Republicans however—they will force fight ug on mat that ground and will score a decisive victory as the people are with them on the issue of protection

Representative (, Fred Williams is not meeting with any better success in impressing upon the minds of the Democratinspority of the Ways and Means (ommittee the importance of placing from o the free list that he did when he endeav ored to take charge of the Speakership ontest This new Democratic blood from Massachusetts swooped down upon the capitol with a might; rush of wind, but it was chiefly noise of a harmless kind When the people come to sum up they will flud that the account will stand about as follows Promises great results lack

It is now stated that under the new election law all I residential Flectors must be nominated in the State Convention, in stead of the District Conventions and that it will be necessary for the gubernatorial convention in Portland next month to 3 1-2 per cent. Interest Semiratify the nonmations of Flectors already made by the Republicans in several of the districts. If this is true it would be well if the gentlemen who are so flerce in their advocacy of this law should get together and try and interpret it before any more mistakes are bade. There is a disposition on the part of certain Democratic organs now that they are confronted with the dissagreeable fact that the Democratic House will exceed the appropriations of the last Republican From House, to try and throw some of the responsibility upon the Republican minority This is so absurdly dishonest that e New York Sun administers the following scathing rebuke to those guilty of

General Henry L. Mitchell has just re- The Consolidation Of East Side Schools.

The City Government has authorized the city treasurer to purchase the lot on Palm street owned by Messrs. L. H. and W. H. Schwartz for \$5500, and that matter of business will soon be transacte in order that a large and handsome school building may be erected there.

For some time it has been deemed destrable to do away with a number of small school buildings on the East side and consolidate the primary and intermediate departments in one large building and the tion of the City Government means that that result will be prought about. The building of the new school struc-

ture is considered necessary for several reasons, among which health, con-venience and expenditure are considered. The old school buildings now in use are unsighty structures, poorly ventilated and without the conveniences which a modern concentrated structure would give. It is proposed to consolidate the State, York, Boyd, Pearl, Grove street and Salem Boyd, Pearl, Grove street and Salem court schools, and probably some others to be determined upon at a later date, in the new building which will be erected on Palm street. When this building is completed then the old school buildings and lots will be sold, and it is estimated that their sale will bring in the neighborhood of \$20,000 to the city, which could be used in payment for the new building.

The lot on Palm street is centrally located and takes in 300 feet of land on that street and \$9% feet on Somerset street, so that ample room will be given for such a building as is needed, together with commodious grounds about it. The surveys will be completed in a few day's and more definite proceedings in relation to build-

definite proceedings in relation to build-ing will tren be considered. No arrangements have as yet been made about the size or material of the building, about the size of material of the values as the project is now in its first stages, by as the project is now in its first stages, but it will probably contain fifteen school rooms, besides the offices and other rooms required in such a struc are. It is intended to have all of the latest modern improvements in the building, and the matter of ventilation will be especially well looked after.

looked after.

The forcing of heated air through the room and giving a constant supply of fresh air is a method now adopted in many of the new school buildings and it is regarded with much favor. The City Government committee, of which Alderman J. H. Snow was chairman, has been actively encared for some time in juvent. actively engaged for some time in investi-gating the matter of having a new build-ing in Bangor and they are convinced of the need of one which should be a first the need of one which shoum be a melass structure. The present altuation that a considerable sum must be expend in repairs upon the old buildings unless the new structure is commenced in a reasonably short time and it is deemed best all things considered to have a new

best all things considered to have a new building.

Another improvement in the School Department will probably be made in a comparatively short time at Abbott Square. The city owns the lot on which the Thoms buildings are located and proposes to take possession of it for school purposes. The buildings will be torn down and the lot will be graded. The fence will then be extended so as to take in the whole of the city property. Eventually another school house will be added in Abbott Square and when that time comes it is probable that a high school building will be erected and the present high school building can then be devoted to the grammar and lower grade schools.

The Crowning Triumph in Medico-Electrical Science! It cures all diseases curable by Electricity. It is a complete battery, as used by the foremost physicians, made into a Belt, so as to be easily worn during work, or at rest. It gives soothing, prolonged currents, which can be carried to any part of the body where there is pain, and will give instant relief, as Electricity permeates the entire system with a natural glowing heat, rejuvenating every weak organ or part of the body. WEAK MEN Dr. Sandan's Electric Belt is no experiment, as we have restored thousands to robust health and vigor, after all other treatments falled, as can be shown by hundreds of cases throughout this State, who would giadly testiry, and from many of whom we have strong lecture bearing treatment to their recovery after using our Belt.
